PROFESSIONAL SUMMARY

Data Analyst with a B.Tech in Information Technology (CGPA 8.52) and hands-on experience in data analysis, predictive modelling, and data visualization from a Data Science and Machine Learning internship. Skilled in SQL, Python, Excel, and Power BI/Tableau, with practical exposure across the full analytics workflow — from raw, multi-table data to cleaned datasets to interactive dashboards and business-ready insights.

SKILLS

- Data Analysis & Statistics: Exploratory Data Analysis, Descriptive Statistics, Data Cleaning, Data Wrangling, Hypothesis Testing
- Programming & Querying: SQL (Joins, Aggregations, Subqueries), Python (Pandas, NumPy)
- Data Visualization & BI Tools: Power BI (DAX, Power Query), Tableau, Microsoft Excel (Pivot Tables, VLOOKUP, Charts)
- Other Tools: Jupyter Notebook, Git, GitHub, MS Office
- Soft Skills: Communication, Problem Solving, Analytical Thinking, Collaboration, Adaptability

PROJECTS

Retail Profitability & Inventory Health Dashboard -Power BI, DAX, Power Query | [Github Repo](#)

- Built an interactive 3-page Power BI dashboard analyzing product-category profitability and inventory health across roughly 10,000 retail orders.
- Wrote DAX time-intelligence measures to surface categories with high revenue but disproportionately low margin, exposing profitability issues hidden behind top-line sales figures.
- Designed a stockout-risk indicator from order frequency and quantity patterns to flag products likely to run out before restock.

Airline Delay & Operations Performance Analytics -Python, Pandas, Jupyter Notebook, Tableau | [Github Repo](#)

- Analyzed a 5M+ row U.S. flight delays and cancellations dataset using Python and Pandas, filtering to a stratified sample for efficient processing.
- Identified the carriers, airports, and routes driving the largest share of delays, then built Tableau visualizations to communicate delay trends and root causes to non-technical stakeholders.

Olist E-Commerce End-to-End Case Study -SQL, Python, Power BI/Tableau | [Github Repo](#)

- Loaded and joined 9 relational tables (orders, customers, sellers, payments, reviews, products) from the Olist e-commerce dataset into a SQL database.
- Wrote multi-table SQL queries to analyze revenue drivers, delivery performance, and seller/customer behavior across the full dataset.
- Combined SQL analysis with Python and a BI dashboard to deliver a single end-to-end view of business performance, from raw data to actionable insight.

EDUCATION

Bachelor of Technology in Information Technology 2022 – 2026
Velammal Engineering College | CGPA: 8.52

HSC (Higher Secondary) 2021 – 2022
Mohammed Sathak Mat. Hr. Sec. School | Percentage: 90%

SSLC 2019 – 2020
Mohammed Sathak Mat. Hr. Sec. School | Percentage: 86%

PRACTICAL TRAINING

Data Science and Machine Learning Intern — Virtual Tech ServicesDec 2024

- Worked on real-world projects involving data analysis, predictive modelling, and data visualization.
- Applied machine learning algorithms using Python to extract insights and support data-driven decision-making.

CERTIFICATIONS

- Google AI Essentials – Coursera (Feb 2025)
- Foundations of Prompt Engineering – AWS Skill Builder (Nov 2024)
- Fundamentals of Machine Learning and Artificial Intelligence – AWS Skill Builder (Oct 2024)
- Hands-on Power BI and Tableau workshop (Mar–Apr 2024)
